About

An enthusiastic undergraduate in Computer Science Engineering (Artificial Intelligence/Machine Learning) seeking internships. Competent in Jupyter/Miniconda, Python, Java, and PyTorch. Investigating domains including data science, deep learning, and machine learning principles. Understanding of algorithms, including entropy/information gain, KNN, decision trees, and perceptrons; Basic knowledge of probability, statistics, and mathematics along with some cryptographic algorithms. Examining ML/DL research: assessment of the literature, design of experiments. Strong problem-solving skills, a firm grasp of algorithms and data structures, version control (Git), and a quick learner. .

Education

VIT Bhopal University, B.Tech. in Computer Science Engineering with Specialization in AI/ML Sept 2023 – May 2027

- GPA: 8.91/10.0

Publications

Fine-Tuning for Code Intelligence: Evaluating LLMs on Custom Programming Benchmarks July 2025

Harsh Sahu, Munsifa Firdaus Khan Barbhuyan, ***Jay Kamavisdar***, Ayushman Mishra, Rishabh Pandey, Samarth Pratap Singh

Paper has been presented in the Conference and will be Published soon

Certifications

Cloud Computing May 2025

- Issuing Authority - NPTEL, India (Certificate)
- **Coursework:** Virtualization, Cloud Computing

Applied Data Analytics June 2025

- Issuing Authority - CEC, NIT Raipur (Certificate)
- **Coursework:** Data Analytics, Power BI, Matplotlib

Projects

Library Management System GitHub Here

- Built a Python-MySQL DBMS library system; currently considering adding a Tkinter GUI for streamlined operations.
- Tools Used: Python 3.12, MySQL

Snake Game GitHub Here

- Developed a Java AWT/Swing snake game with dynamic scoring and speed scaling.
- Tools Used: Java AWT & Swing with Concepts from Data Structures

Basic Water Quality Analysis GitHub Here

- Implemented an end-to-end ML pipeline (cleaning, feature selection, modeling, evaluation) in Python with a Power BI dashboard.
- Tools Used: Python 3.12, Matplotlib, Numpy, Seaborn, sklearn, Power BI

GarudaVPN (Ongoing) GitHub Here

- Engineering a Java-based VPN leveraging X25519, HKDF, AES, sockets, and OpenVPN with BouncyCastle for

cryptography.

- Tools Used: Java, OpenVPN, BouncyCastle API, Java Cryptographic and Security Libraries.

Technologies

Languages: HTML, CSS, Python, Java, Java Servlets & JSP, MySQL, MongoDB

Technologies: MySQLConnector, Tkinter, Java AWT & Swing, Java Security, Matplotlib, Seaborn, PowerBI, Jupyter/Miniconda, BouncyCastle
